VHDL whiz

VHDLwhiz.com

Certificate of Achievement

This is to certify that

Harald Blab

has completed the Dot Matrix VHDL and FPGA course

Date of issue: May 5, 2021

This is a comprehensive VHDL course covering advanced design strategies for FPGA development. The 120+ lectures teach methodologies allowing for code reuse while maintaining the highest verification standards on every hierarchy level.
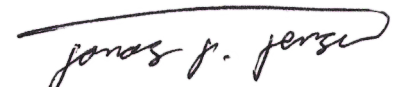

Concepts covered by this course include

- Advanced VHDL constructs
- Verification component
- Self-checking testbench
- Interactive TCL-driven testbench
- Inspection of synthesis logs and RTL schematics
- Assembling and lab testing of physical prototype
